

## Contents

### **Plenary Lectures**

- M. Nielsen, J. Costa* – Seismic Design by Rigid–Plastic Dynamics: Methods for Plastic Design Against Seismic Actions in Reinforced Concrete Structures 15
- Ya. Ivanov* – Technical and Technological Aspects of the Accession of the Bulgarian Civil Engineering Science and Practice to the European Union 38
- I. Dabijeva* – Introduction and Application of Eurocodes in National Technical Legislation – Advantages, Challenges and Problems 48

### **Section 1: Advances in Structural Design and Constructions**

- G. Frangov, M. Hamova, A. Mihaylov* – Restoration of Foundation Under an Aluminum Melting Furnace 57
- V. Nedev* – Local Control of the Internal Forces and the Bending Deflection in a Flat Structures by Means of Shprengels' System 62
- A. Georgiev, S. Georgiev* – Structural Solutions for the Road Overpasses Within the Project for the New Speed Railway Plovdiv – Svilengrad 67
- B. Belev, B. Parvanov, D. Dimitrov* – The Stonehenge 21 project 73
- S. Bratoev* – Regarding the Vibration Switch Off from the Sofia Metro Train Operation 79
- S. Zlatković, N. Jokić* – Business Office above Water Tank "Main" – Belgrade 84
- N. Zechev* – Specificity of the Designing and Building in Underground Conditions 89
- S. Bratoev, N. Zechev* – Possibilities for Integration of Diaphragm Wall with the Construction of the Equipment 94
- D. Partov, M. Petkov* – Application of Composite Structures in Bulgaria 99
- D. Nazarsky* – Increasing the Durability of Reinforced Concrete Buildings and Structures being under the Effect of Industrial Aggressive Environments 105
- A. Gupta* – Construction of Cement Concrete Pavement – A Case Study 111
- J. Manrique, M. Al-Hussein, A. Bouferguene, H. Safouhi* – Spatial Analysis and Optimization of Bracing Systems for Tilt-up Constructions 129
- Ts. Georgiev, M. Tzankov, V. Naidenov* – The Penthouse of Inter Expo Center or How Instead of 4 Floors 5 ones could be Executed 138

### **Section 2: Theoretical and Experimental Researches of Structures**

- M. Dashevsky* – Static and Dynamic of Rubber–steel Pads 149
- E. Korzeniowska, Z. Rawicki* – Investigations, Operating Principles and Application of Cellular Geocells in Geotechnical Constructions 158
- S. Parvanova, G. Gospodinov* – The Dual Boundary Element Method applied to Development of Multiply Discrete Cracks 166
- N. Ignatiev, D. Michaleva* – Design of Reinforced Concrete Infilled Structures 174
- V. Slavchev, V. Kantchev* – Stress–Strain Determination in Reinforced Concrete Sections, according to Real Stress–Strain Relations of Materials 182
- R. Sinđić–Grebović* – Theoretical Analysis of the Behavior of the Short High Strength Concrete Beam Subjected to Shear 189
- L. Georgiev* – Application of Linear Elastic Fracture Mechanics for Evaluation of Remaining Fatigue Life of Steel Members 197

<i>D. Partov, V. Kantchev</i> – Contribution to The Methods of Analysis of Composite Steel–Concrete Beams, regarding Rheology	206
<i>K. Kazakov</i> – Some Requirements for $C^1$ Mapping Elastodynamical Quadrilateral Four and Eight Node Infinite Elements	212
<i>K. Kazakov</i> – On the Different Classes Infinite Element Formulations	219
<i>C.–E. Teleman, E. Axinte</i> – Predicting Maxim Values of Fluctuating Wind Pressure on Light Envelopes of Buildings Placed in Urban Areas	226
<i>L. Petrova, I. Vaisilov</i> – Application of Finite Element Method for Stability Analysis of Simply Supported Bar with Step–Like Varying Circle and Ring–Like Cross Section	233
<b>Section 3: Seismic Mechanics and Seismic Engineering</b>	
<i>M. Kostov, E. Vaseva, A. Kaneva, D. Stefanov, G. Varbanov, N. Koleva</i> – An Advanced Approach to Earthquake Risk Scenarios of Sofia	245
<i>I. Minchev</i> – Displacement as a Method Determining Seismic Impact on Building Structures	252
<i>S. Miteva, I. Minchev, N. Ianev</i> – Method for Seismic Risk Evaluation Connected Width Building Structures on The Bulgarian Territory	257
<i>K. Minchev, I. Minchev</i> – Binding – Counterfort Fortification of Buildings	263
<i>I. Paskaleva, G. Koleva</i> – An Approach for Assessing Parameters for Structural Control Devices	267
<i>E. Vaseva</i> – Seismic Assessment of R/C Frames with Masonry Infill Walls in View of EC8	274
<i>I. Paskaleva, Gy. Szeidovitz, K. Kostov, G. Koleva, G. Nikolov, K. Gribovszki, T. Czifra</i> – Calculating the Peak Ground Horizontal Acceleration Generated by Paleoearthquakes from Failure Tensile Stress of Speleothems	281
<i>M. Kostov, D. Stefanov, N. Koleva</i> – Numerical Simulations and Engineering Methods for Evaluation of Seismic Behaviour of Experimentaly Tested Shear Wall	287
<i>I. Paskaleva</i> – Seismic Risk Assessment for Urban Areas: Case Study – Town of Russe	293
<i>N. Ianev</i> – Some Problems Related with Seismic Resistance of Bridges in Bulgaria	301
<i>K. Hadjiyski, R. Glavcheva</i> – The Md=4.5 Earthquake of Feb. 20, 2006 in the Region of Kardjali – Macroseismic Survey in the Epicentral Zone	307
<i>K. Hadjiyski, S. Simeonov</i> – Characteristics of the Md=4.5 Earthquake of 20th February 2006 in the Region of Kardjali and the Following Aftershocks	314
<i>S. Simeonov, K. Hadjiyski, R. Ivanov</i> – Full Scale Testing and Dynamic Identification of RC Residential Buildings	320
<i>R. Ivanov</i> – The response of unanchored bodies subjected to 3–D seismic motion	326
<i>S. Aleksić, B. Kolundžija</i> – Influence of the Frequency Band of the Seismic Loads on the Dynamic Response of the Structure	332
<i>M. Kouteva, I. Paskaleva, G. Panza, F. Romaneli</i> – Some Numerical Experiments on the Influence of the Local Geological Conditions on the Seismic Signal and the Damage Index	339
<b>Section 4: Construction Design Software</b>	
<i>S. Mammadov, C. Imamaliyeva, T. Agalarova</i> – To the Problem of Seismic Wave Propagation in Different Elastic Medium	347
<i>K. Kashani Jou</i> – Construct IT; A Construction Management Tool in New Millennium	356
<i>E. Galev</i> – Software Architecture for Landscaping Design Projects	363
<i>K. Simeonova, G. Milanova</i> – Effects of Buckling Load and Coupling Coefficients, on some Parameters of Composite Laminate Plates	369
<i>J. Olearczyk, M. Al–Hussein</i> – Utilization of 3D CATIA Solid Modeling for Oil Sands Tailings Research Facility Pilot Plant	374

**Section 5: Reconstruction and Retrofit of Structures**

<i>D. Dakov, G. Linkov, B. Belev</i> – Lessons Drawn from the Failure of the Suspended Ceiling at the New Terminal of Sofia Airport	391
<i>S. Karczmarczyk, Z. Rawicki</i> – Protection and Maintenance of the Post-industrial Historical Objects in Salt Mine in Wieliczka	398
<i>G. Georgiev</i> – Renovation of Load-Carrying Ability and Reinforcement of R. Concrete Elements and Connections Between them in Sanitation of Panel Buildings	407
<i>E. Sergunicheva</i> – The Difficulties of Reconstruction and Construction Design at New Conditions of Building Operation	412
<i>S. Milovanović, S. Atanasovski, G. Aleksovski, S. Čurilov</i> – Reconstruction and Adaptation the Hotel “Epinal” in Bitola	415
<i>V. Safronov</i> – Damages in Reinforced Concrete Road Bridges which Influence their Load Capacity	422
<i>A. Bota, M. Terțiu, A. Bota</i> – Specific Problems at an Old Concrete Bridge Rehabilitation	428
<i>Ž. Radovanović</i> – Estimation of Temperature Action in Bridge According to EN 1991-1-5 and Measurement Plan in the Concrete Pedestrian Bridge	435
<i>R. H. Abu-Zeyad, A. S. El-Dieb, N. H. Abdel-Mutaal, N. H. Amer</i> – Retrofitting Strengthened Two-way Solid Slabs Provided with Openings	443
<i>A. Gavriloska, J. Šelih, R. Žarrnić</i> – Role of Discontinuous Bond in RC Beams Strengthened with CFRP Plates	456

**Section 6: Hydrotechnical Facilities**

<i>B. Petrov, R. Grujev</i> – Appraisal of Exploitation-Hope of Intake Tower and Main Outlets of Aleksandar Stamboliiski Dam and Measure for Rehabilitation of Project	465
<i>J. Miletin, B. Obrenović</i> – Reconstruction of “Rakovica” Reservoir	471
<i>R. Dieckmann, T. Hartkopf</i> – Restoration Works at Eider Storm Surge Barrier	477
<i>V. Todorova-Müller, S. Bausch</i> – Comparatively Calculations of Rotary-Symmetrical Massive Sediment Trap	485
<i>N. Tayade</i> – River Diversion Project	490
<i>T. Samardzioska, V. Popov, M. Cvetkovska</i> – Two-phase Flow Through Porous Fractured Rocks	493
<i>G. Droumeva, J. Marinski</i> – Comparison Between Two Methods of Approach for Prediction of Horizontal Breaking Wave Force on Vertical Wall Structures	501

**Section 7–8: New Materials, Isolations and Installations**

<i>V. Stojanov, A. Popazov</i> – The Lozolit Panels Strength and Deformability Investigation	509
<i>M. Biluš, V. Duplančić, I. Muraj</i> – New Thermal Insulation Materials in Buildings	513
<i>S. Milkov</i> – Problems with Application of Plastered Waterproofing	518
<i>G. Babachev</i> – The Superplasticizers – Efficient Modifiers for Concrete	523
<i>A. Yanakieva, D. Pashkouleva</i> – Surface texture assessment of AN Epoxy insulated bar	528
<i>M. Salau, A. Farayola</i> – Structural Engineering Characteristics of Locally Available Steel Reinforcing Bars in Nigeria	534
<i>J. Salaj, V. Georgiev</i> – Antinoise Walls	543
<i>I. Dobрева</i> – Concretes and Products of Lightweight Aggregates with Utilization of Industrial Wastes	550
<i>G. Stanilov, D. Nazarsky, A. Savova</i> – Geological Barrier at Landfill on the Basis of Loess-cement Membrane	555

<i>S. Germanov</i> – PENETRON – Integral Capillary Concrete Waterproofing System	561
<b>Section 9: Foundations of Buildings and Structures</b>	
<i>B. Tchakalova, K. Todorov, D. Karastanev</i> – Isolation Screens by Plastic Loess–cement Mixtures	567
<i>H. Zayakova</i> – Influence of Displacement Rate on Residual Shear Strength of Soils from Formed Landslide Surfaces	573
<i>E. Demireva</i> – “Berliner Wall”– Technological Opportunities for Fortification of Deep Excavations	578
<b>Section 10–11: Technology and Management of the Construction Work.</b>	
<b>Legislation and Normative Issues</b>	
<i>J. Marinski</i> – On the Need for Improving Technical Standards and Guidelines in Coastal Engineering	587
<i>H. Boyadjiev</i> – Examination of the Congruence Between the Execution and the Project of Construction Technologies During Building Reinforced Concrete Structures in Compliance with BDS EN 13670–1	592
<i>H. Odjagov</i> – Mitigation of Emergency Situations and Sustainable Development of the Republic	601
<i>H. Odjagov</i> – A Complex Scientific Approach to the Problems of Prevention and Elimination of Emergency Situations	607
<i>V. Stoyanov, N. Uriev, Ya. Ivanov</i> – Current Trends for Determination of Concrete Workability	612
<i>L. Hrishev</i> – Methods for Choice of Industrial Flooring	618
<i>D. Nazarsky, V. Kroumov, B. Petrov</i> – Evaluation of the Condition and Rehabilitation of a Reinforced Concrete Construction of a Thermal Power Station Trestle	624
<i>S. Sivrieva–Zlatarova</i> – “Fire Safety“ – The Second Essential Requirement of Directive 89/106 EEC	629
<i>S. Sivrieva–Zlatarova</i> – Design for Fire Safety in Buildings and Facilities based on Eurocodes	634
<i>T. Roshavelov</i> – Control of Correspondence for Project Concrete According to BDS EN 206–1	640
<i>R. Guglev, K. Glushkova</i> – Evaluation of Accordance of the Building Material “Joinery” – Intentions and Reality	646
<i>R. Guglev</i> – Technical Requirements for Project Documentation for Implementation of Planned Changes	650
<i>D. Milinkovic, R. Djuricic, Z. Popovic, M. Savic</i> – Innovations in New European Regulations for Certification of Construction Products	661
<i>M. Knezevic, M. Gotic</i> – How to Manage the Design and Construction of the Activities for Building Highways	666
<i>Authors’ Index</i>	673
